

ARTIFIX

DEMOCRATIZING ROBOTICS

The Problem

- Industrial robotics is too expensive
- Complex implementation processes
- High expertise requirements
- Limited flexibility
- Expensive maintenance

Our Solution

**Art|fix: AI-Powered
Robot Design &
Management**

Automated Design:

RAG model for optimal configurations

Standardized Components:

Modular, plug-and-play parts

Full Lifecycle Management:

From design to maintenance

Subscription Model:

Hardware-as-a-Service

How Does It Work?

1. Describe Your Needs

AI generates optimal design

2. Select Components

Standard or Pro parts library

3. We Build & Deploy

Fully Tested and ready

4. Ongoing Support

Maintenance and upgrades

Market Opportunity

Total Addressable Market (TAM)

- Global Industrial Robotics: \$75B by 2027
- 15% CAGR in automation sector

Our Initial Focus

- SMB Manufacturing (\$5m-\$50M revenue)
- Warehousing & Logistics
- Estimated Initial Market: \$10B

Market Segmentation

Target Market Distribution (Year 1)

Revenue Growth Projection

Q4 2026
\$2 Million

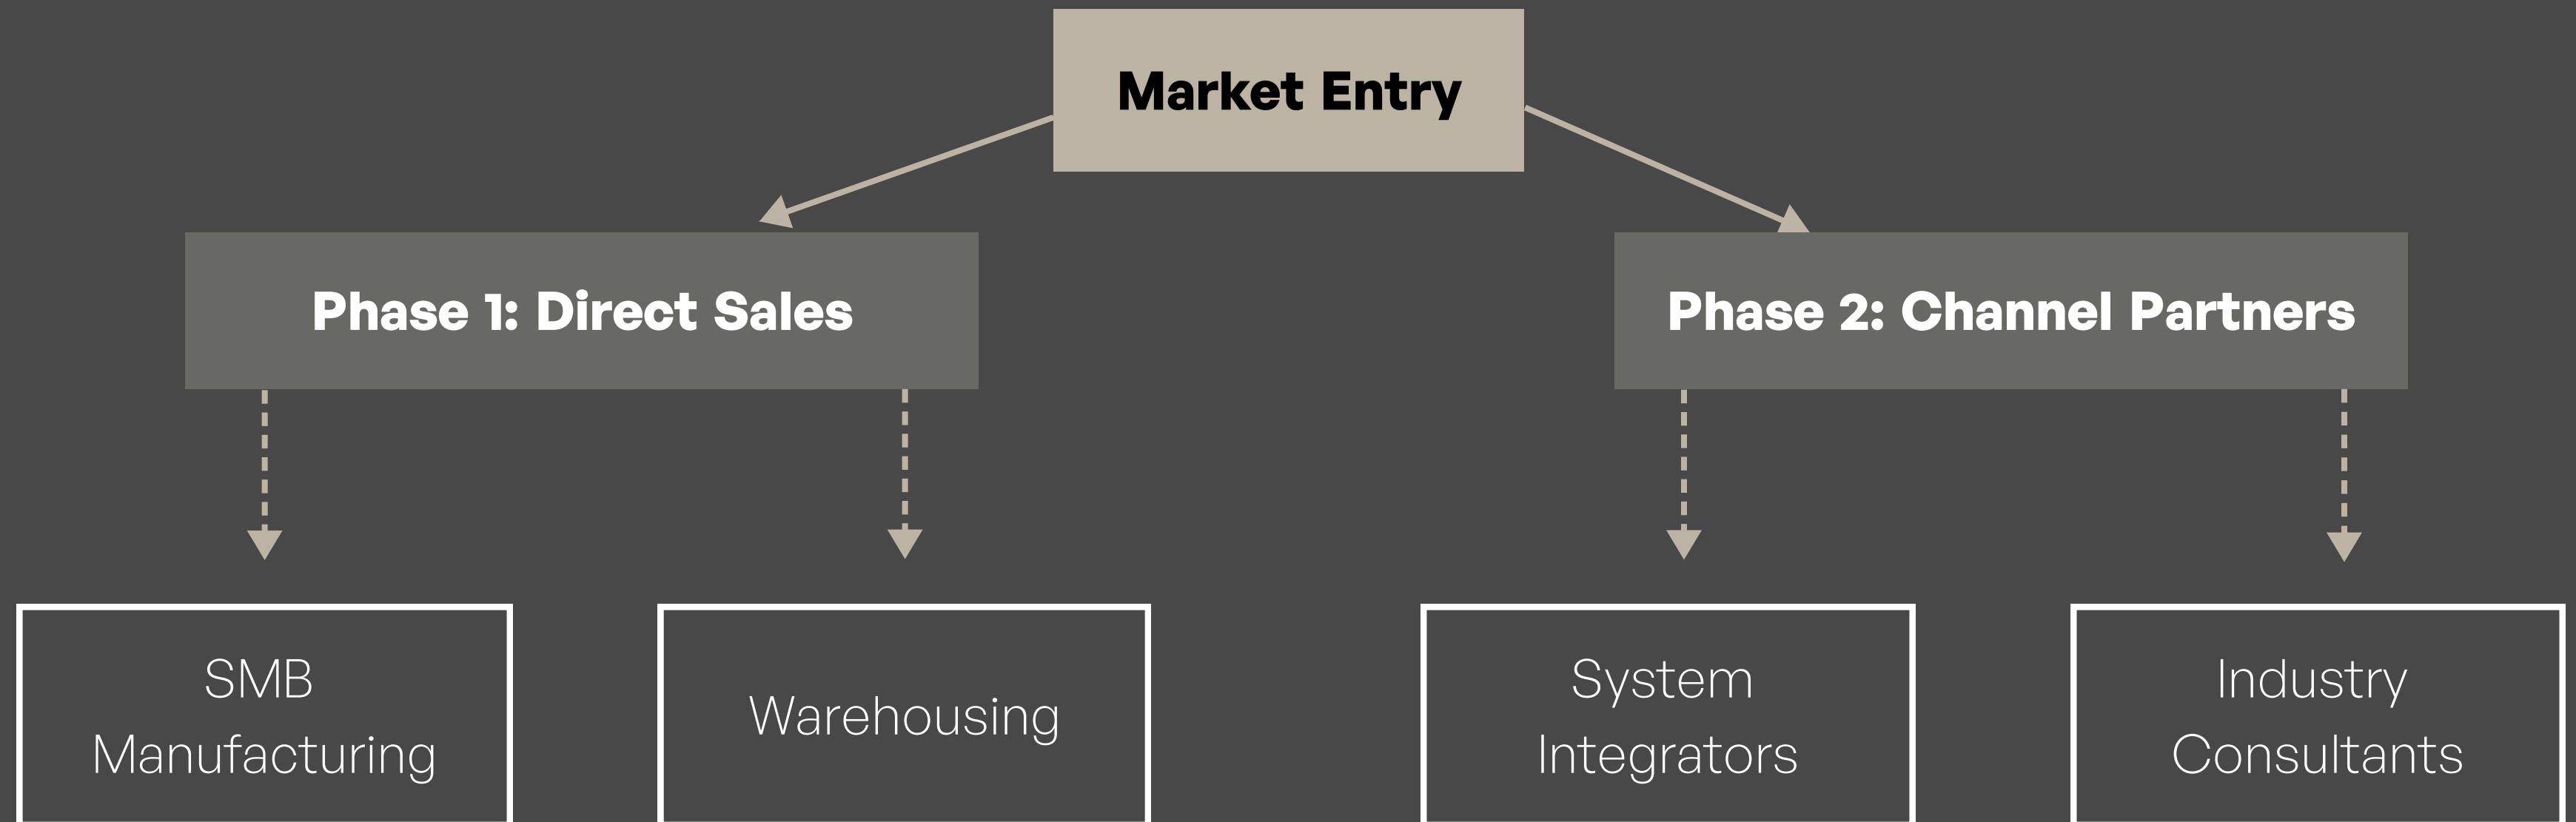

Q4 2027
\$15 Million

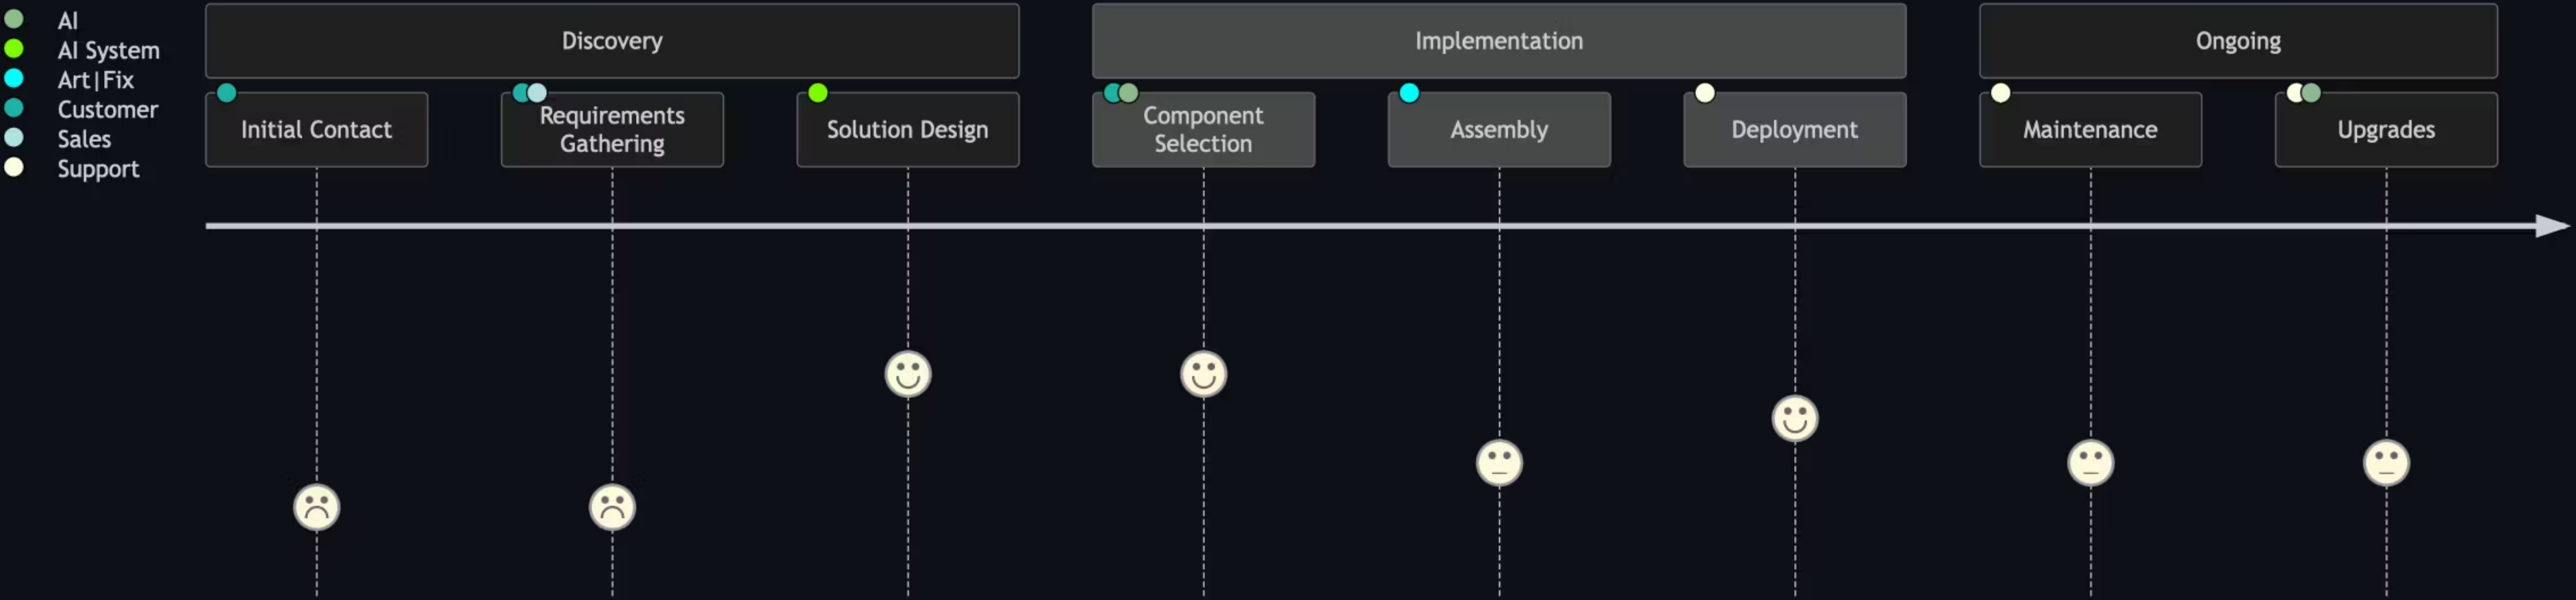

Q4 2028
\$50 Million

Go-to-Market Strategy

Customer Journey

Art | Fix Implementation Process & Confidence Levels

Competitive Advantage

Traditional Robotics

- High upfront costs
- Complex integration
- Limited flexibility
- Expertise required

Art|fix

- Pay-as-you-go model
- AI-driven design
- Modular components
- Full lifecycle support

Technology

Proprietary AI Design System

- Custom-trained RAG model
- Optimized component selection
- Automated configuration
- Continuous learning

Patent Strategy

- Core component designs
- Assembly mechanisms
- Control systems
- Integration methods

Business Model

Subscription Tiers

Basic | Standard parts, essential supports

Professional | Limited pro parts access

Enterprise | Full pro parts access, priority support

Revenue Streams

- Monthly subscriptions
- Pro parts upgrades
- Maintenance services
- Patent licensing

Component Strategy

Basic

- Basic Components
- Common Parts
- Open-Source
- Basic Support

Professional

- Patented Designs
- Premium Parts
- Custom Firmware
- Priority Support
- Advanced Analytics

Enterprise

- Full Patent Access
- Custom Parts
- Enterprise Firmware
- 24/7 Dedicated Support
- Predictive Maintenance

Traction & Roadmap

Current Status

- RAG model prototype
- Initial patent filings
- Partner discussions
- MVP development

Next 12 Months

- First customer pilots
- Patent portfolio expansion
- Sales team buildout
- Market expansion

Financial Projections

Year 1

- 20 pilot deployments
- \$2 Million revenue target
- Focus on SMB manufacturing

Year 3

- 500+ active subscriptions
- \$50 Million revenue projection
- Multi-industry presence

Investment Ask

Seeking \$1 million Pre-seed
round

Use of Funds

Product development (40%)

Patent filings (20%)

Team expansion (25%)

Marketing & Sales (15%)

Art|fix

Meet the Founders of Art|fix

Taylor Mohney is a seasoned technical leader with a strong background in deploying secure AI systems within the Department of Defense. With extensive experience in building mission-critical platforms, Taylor developed a video conferencing system boasting 99.9% uptime, supporting over 100 concurrent users. AWS-certified in DevOps and Machine Learning, Taylor currently leads Art|fix's RAG architecture and hardware integration. With a foundation in electrical engineering and a focus on robotics, Taylor is passionate about advancing component standardization to drive innovation in the tech industry.

Dorian Hryniewicki is a full-stack engineer with extensive experience in systems integration, modernization, and AI-driven deployments. Background includes architecting secure, scalable solutions for both government (USDA, DoD) and commercial sectors, with a strong focus on working alongside data scientists to optimize machine learning performance. Proficiencies span modern cloud infrastructures, DevSecOps best practices, and end-to-end platform development, always emphasizing seamless integration and impactful innovation. Now leading an AI robotics company aimed at transforming how businesses deploy and interact with next-generation automated systems.

Taylor Mohney | Dorian Hryniewicki

"When we strive to become better than we are, everything around us becomes better too."
